Review of Outlier Activity Data

The initial appointment and reappointment processes include the Credentials Committees' review of various "outlier" information (i.e. claims history, disciplinary actions, health issues, peer review, and the various types of privacy violations) reported by applicants, identified through the credentialing process, and/or reported by one of the Medical Staff committees. Outlier activity data was present on a total of 17 applicants for appointment and 34 applicants for reappointment. These data were reviewed by the applicant's Department Chair and the Credentials Committee. The Credentials Committee made recommendations to the Medical Staff Executive Committee in each case.
