UNC ORTHOPAEDICS

Orthopaedics Prompt Care Referrals

We provide walk-in orthopaedic care for people who can be transported by regular automobile and not by ambulance or stretcher. We provide care for strains and sprains, fractures/possible fractures, sports-related injuries, cast problems, and injuries that do not require stitches.

We are not equipped to provide care for head trauma, open fractures, spine injuries, lacerations requiring stitches, chronic or long-standing conditions, orthopaedic second opinions, or pain medication refills.

Please bring any x-rays, MRIs, or other imaging studies that have already been completed with you so we do not have to repeat these studies.
