Help the Pediatric Rehabilitation Medicine Team Care for Children in Haiti

Dr. Alexander

We've been invited to join a group headed to Port-au-Prince, Haiti in May 2014 to help care for disabled children at the Zanmi Beni Orphanage but we need your help to get there.

Zanmi Beni was created to care for orphans with physical and/or cognitive disabilities who were displaced from their previous hospitals and orphanages by the devastating Haiti earthquake in January 2010.

Dr. Sanford

We'll be caring for the orphans and educating their caregivers about ways to improve the health and function of the children they serve. We'll also try to set up a telemedicine unit there to enable us to continue delivering consultations and educational programs after we've returned home.

A fund has been set up on the NC Children's Promise website for tax-deductible charitable donations to help us make the trip and bring equipment and supplies along with us. We're trying to raise $5,000 in the next month to cover some of our costs.

If you feel so moved, we'd appreciate any gift you could make.

You can either make a check payable to the Medical Foundation of NC (memo line: PEDIATRIC REHABILITATION MEDICINE FUND – HAITI 14) and mail to: Medical Foundation of North Carolina, 880 Martin Luther King Jr. Blvd., CB# 7565, Chapel Hill, NC, 27514-2600 or you can

Go to https://www.ncchildrenspromise.org/give/givenow and choose the "PEDIATRIC REHABILITATION MEDICINE FUND – HAITI" from the "Designation" drop down menu.
