

Volunteer Corps of Trainers

The Carolina Geriatric Education Center has launched a Volunteer Falls Champion Instructor Program to disseminate Falls Prevention workshops across the state. An announcement was posted on the statewide Members of the statewide Falls Prevention Coalition network to recruit volunteers to provide falls prevention training. The response to this call has been excellent, with over 18 highly qualified individuals, from professors to master clinicians all who will volunteer their time to be trained in content delivery and have committed to teaching one multi-session falls prevention workshop per year.

Volunteer Falls Champion Instructors attend a four hour training which includes content and facilitation skills. The program goes beyond simple content to the next level. Each Champion Instructor will garner commitment from those attending his or her workshop to review the systems of care at their individual institutions and determine how to embed falls risk screening into the culture of practice. Follow up is provided to support and reward the systems change.

Click here to email [Dr. Shubert](mailto:Dr.Shubert) to become a Falls Champion Instructor or request a Workshop.
