

Research Services for Utilization of Laboratory Testing (ReSULT)

We provide the expertise needed for the clinical laboratory testing component of research studies in all Health Affairs disciplines. Our consultation and management services include:

- Test selection in chemistry, microbiology, & hematology consistent with research questions
- Development of cost estimates for proposals
- Reference laboratory evaluation & contract development
- Management of all aspects of quality assurance, specimen handling, and data reporting
- Collaboration with the research team on test results interpretation

For more information about ReSULT, please contact these UNC faculty:

Dr. Vicky LeGrys at 843-4473
