Transition to Practice Seminar & Resident Symposium

2016 Transition to Practice Seminar

Term of the Contract/Agreement*

- Term = the length of the contract
- Finite vs Indefinite contracts
- Evergreen renewal provisions

*Note: Contract is a scary word that triggers contacting an attorney. Agreement is a softer word that employers use. Everyone has heard of an "Agreement Attorney."
2016 Resident Day
Transition to Practice Seminar & Resident Symposium

Former Resident Panel: “Pearls: What I know now and what I wish I had learned in residency”
Moderator: Dr. Kimberley Nichols; Panelists: Drs. Rachel Beach, John Berry, Ryan Bialas, Chris Gratian, and Katherine Suttle

Transition to Practice Seminar & Resident Symposium

April 23rd, 2016
THE UNIVERSITY OF NORTH CAROLINA AT CHAPEL HILL

Implementation of a preoperative algorithm reduces number of tests ordered in ambulatory surgical patients
Vishal Dhandha, MD (CA-2)
Amine El-Amraoui, MD (CA-3)
Barden Berry, MD (CA-1)
Mentor: J. David Zvara, MD

Background

• Accurate and expedient identification of anticoagulants and antiplatelet agents is essential for neuraxial procedures.

• Risk of epidural hematoma is much higher when a neuraxial procedure is inappropriately timed with anticoagulants.

• Currently, a comprehensive chart review requires going through multiple EPIC tabs to identify timing / administration of anticoagulants.

Drs. Vishal Dhandha and Bilal Lateef
2016 Resident Day
Transition to Practice Seminar & Resident Symposium

Drs. Marc Levi (presenting on behalf of Dr. Smeltz) and Katherine St. Romain

Resident Symposium Team-Base Project Presentations

Muhammad Ashraf, MD
The Reasons for Missed Appointments at an Outpatient Academic Pain Center: A Brief Survey

Kelly Bruno, MD
Early Removal of Urinary Catheters in Patients with Thoracic Epidurals

Vishal Dhandha, MD
Implementation of a Preoperative Algorithm Reduces Number of Studies Ordered in Ambulatory Surgical Patients

Christoforos Frangopoulos, MD
Adductor Canal versus Femoral Nerve Catheters: A Retrospective Comparison in Total Knee Arthroplasty Patients

Jessica Hodnett, MD
Implementation of an Updated UNC Hospitals Standard Surgical Blood Order Schedule and UNC Intraoperative Blood Product Transfusion Best Practice Guidelines

Michael Kazior, MD
Standardization of Intraoperative Handoffs

Bilal Lateef, MD
Development and Implementation of an EPIC Anticoagulation Flowsheet

Aaron Low, MD
Reducing Noise During Pediatric Inductions: Making Anesthesia Safer for our Children

Morgan Marino, MD
Decreased PACU Time and Improvement Immediate Postoperative Mental Status as a Result of an ERAS Clinical Pathway

Gregory Maves, MD
Implementation of an Enhanced Recovery Protocol for Children Undergoing Major Bowel Surgery

Timothy Rohman, MD
Enhanced Recovery Pathway (ERP) for Thoracic Surgical Patients Decreases PACU Recovery Time and Opioid Use

Dustin Sitzmann, MD
“Time is Brain”: Is the Addition of an Anesthesia Care Team a Waste of Brain?

Alan Smeltz, MD
The Use of Gas-Sampling Nasal Cannulas verses Face Masks for Sedation Cases

Katherine St. Romain, MD
Obstetric Hemorrhage Management: Creation of an OB Anesthesia Hemorrhage Cart
