Beacon Program - **How to Screen for Abuse**

**Ask**

a) For Adults
   In a CONFIDENTIAL setting ask screening questions:
   
   “Because so many people deal with fear and abuse in their relationships, we ask these same questions of all our patients:”
   
   - Is abuse, violence, or sexual assault a problem for you in any way?
   - Does your partner/caregiver(s) threaten or try to control you?
   - Have you been influenced to sign documents you don’t understand or have not read?

a) For Children
   Health care providers assess:
   
   - Do you (the provider) have any concerns about suspected abuse or neglect?

**Document** possible outcomes in EPIC

1. Patient answers **YES** to question OR **CLINICIAN CONCERNED** in cases of child neglect/abuse

2. Patient **DENIES** abuse, but **CLINICIAN CONCERNED** (reasons for concern will vary)

**Acknowledge**

Let the Patient know you hear them and want to be supportive:

- I’m very sorry this is happening to you.
- I’m glad you were able to tell me.
- You do not deserve this.
- It’s not your fault.

3. Patient answers **NO** to the question OR **CLINICIAN NOT CONCERNED** in cases of child neglect/abuse

4. Clinician is **UNABLE to ASSESS** (to ask the questions) for a variety of reasons. Some reasons might include:
   - Not able to see Patient in a private confidential setting
   - Patient unconscious or physically unable to respond
   - Patient lacking capacity
