

Housing

The ORPCEs will coordinate housing arrangements for students during their Ambulatory Care Selective. If the ORPCE is unable to identify suitable housing, the ORPCE and/or the UNC Department Administrative Coordinator with which your practice is associated may ask you and/or your practice staff to help arrange appropriate housing. Usually the housing is a room rented in a private home, and reimbursement of \$11.00/day is available for housing providers. The local ORPCE will process the paperwork required for these payments. The ORPCEs and/or the Department Administrative Coordinators may also pass along to student's information about the housing (for example, if they need to bring cooking utensils or linens, or if they will be sharing an apartment).

Malpractice Insurance

All UNC-CH School of Medicine students who are registered to participate in the Ambulatory Care Selective course are covered by malpractice insurance (in excess of \$1 million) while participating in the course at their assigned sites.
