Do you have diabetes?

Did you know that you need an eye exam at least once a year to screen for retinopathy?

Now you can have your eye exam on the same day that you see your doctor in the Internal Medicine Clinic

- We offer eye screening for patients with diabetes in our clinic
- The screening should take about 15 minutes
- We take a digital picture of your eyes with our retinal camera
- This screening does not require your eyes to be dilated
- All pictures are sent to a UNC eye doctor and evaluated
- We will mail the results of the exam to you
- Some patients will need to be seen in clinic to follow-up possible problems seen in the picture
- We will call you if an appointment with UNC Ophthalmology (eye clinic) is needed

Ask how you can be screened today or call 919-843-0391 for an appointment
