

Building: Genetic Medicine

Location: Lower Basement, Suite 30

Date of Issue: 05-03-2017

Date Location First Occupied: 8/1/10

Housing Type: IVC

Report#: 2017-020627

Species: Mouse

Testing Laboratory: Charles River Diagnostic Laboratory

This report summarizes the results of tests performed on surrogate, cull and sentinel mice from all rooms in the MMRRC-UNC barrier-maintained production facility. Note data are reported as positive tests/total tests performed. Current positive results are bolded. Please contact the MMRRC-UNC at mmrc_health@med.unc.edu with questions about this report or animal health issues.

Co-PI – MMRRC-UNC

Associate Director – Department of Laboratory Animal Medicine

Professor of Pathology, University of North Carolina-Chapel Hill

Latest Result is the date animals are removed from the colony to begin the health testing process. Compilation of all results for web posting may take several weeks.

[#]From 2003-January 2007, Charles River was the testing Laboratory. February 2007- October 2011, RADIL was the testing Laboratory.

^{*}The MMRRC moved to a brand new animal facility in the Genetic Medicine Building from BerryHill Hall 8/1/10. Prior to 2010, fewer animals were sent for testing due to less rigorous standards in the previous facility.

[‡] November 2011, MMRRC-UNC switched all testing to Charles River Diagnostic Laboratory.
