North Carolina DNA Day 2009—Another Successful Year

Antibody Bingo, counting taste buds, observing mucus samples of patients, DNA fingerprinting suspects, testing success of genetically modified crops and constructing a Simpsons pedigree... what do all these have in common? These are a sample of hands-on activities that high school students and middle school students participated in across North Carolina for DNA day.

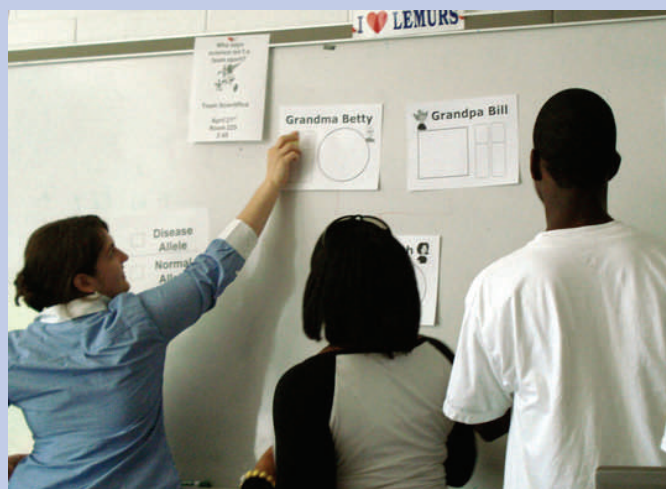

Now on its third year, the [NC DNA Day](#) concluded its outreach event during the commemoration of [National DNA Day](#) on April 25th, 2009. With the goal of getting young students excited about science and introducing scientific careers as a viable option for them, the NC DNA Day program visited over a hundred schools and utilized the expertise of over 150 graduate students, postdoctoral fellows and faculty from ten research and academic institutions all over NC.

The students were also exposed to various research topics that their DNA Ambassadors were actively involved in. When asked if their perception of a scientist changed, one student answered "I think it would be an interesting career because at first I wasn't sure what scientists do."

The teachers were very excited to have DNA Day in their classrooms. One wrote (*Story continued on [page 2](#)*)

Middle school students at Martin's Creek School in Murphy, NC participate in the pharmacogenomics module by counting each others' taste buds.

Beth Sutton helps students at Riverside High in Durham set up the Simpson's pedigree chart while presenting the Genes & Disease module.

NC DNA Day 2009 a Great Success (continued from page 1)

“the information relates well to the standard course of study”, while another said, “I wish there were more people doing it so all the classes in my school could be visited.”

The 6 learning modules presented throughout the state were all developed by UNC graduate students to augment the NC course of study. The modules remain available on the [NC DNA Day website](#) for teachers who want to take advantage of them throughout the school year.

Even though next year’s NC DNA Day is almost a year away, preparations for that event are already in the works to ensure continued success of this important science outreach program. Most of the 150 plus DNA Day Ambassadors have already expressed interest in being involved again next year.

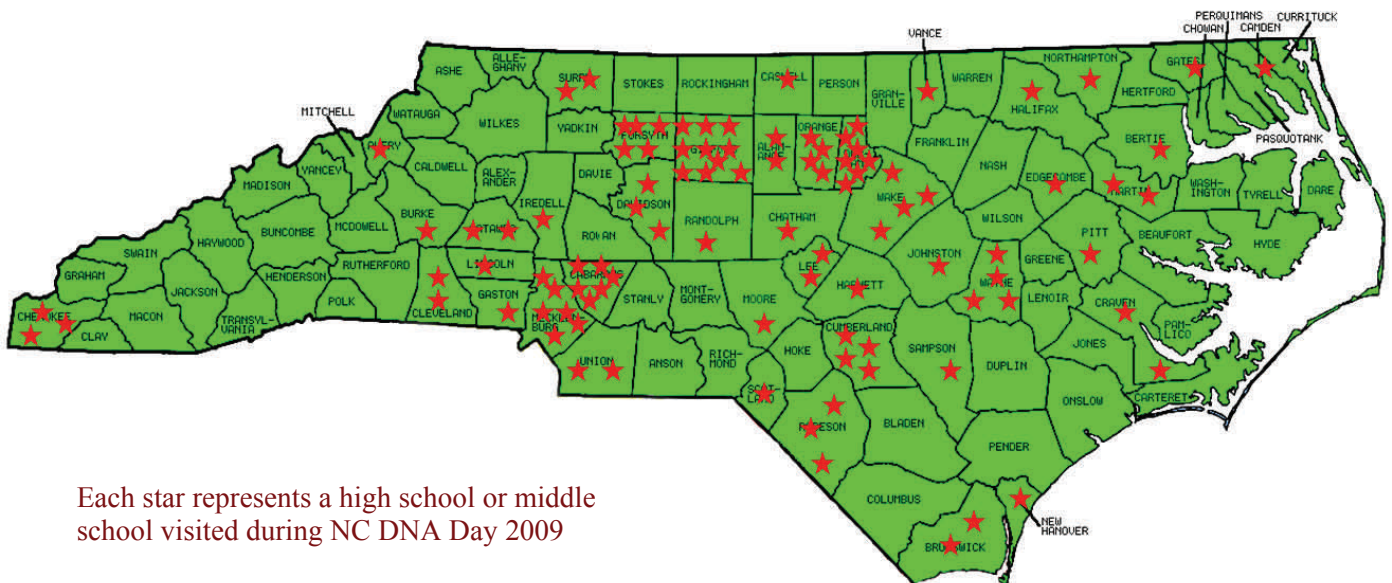

We thank all our DNA Ambassador volunteers for their time, our various sponsors for financial support, and members of the UNC Logistics Committee for making this year’s DNA Day a high impact outreach event.
– Paul Medina

Paul Medina is the Director for NC DNA Day and can be reached at pmedina@email.unc.edu.

Josh Currie hands out antibody “bingo” cards while presenting the Immunology module at East Burke High School in Connelly Springs, NC

School’s Visited During NC DNA Day 2009

Dr. Ashalla Magee Freeman Hired as Associate Director of Minority Affairs

Dr. Ashalla Magee Freeman has joined the TIBBS team as the new Associate Director of Minority Affairs. Ashalla came to UNC in 2004 as a postdoctoral fellow in the SPIRE Postdoctoral Training Program after receiving a PhD in Microbiology from the University of Alabama at Birmingham.

Ashalla has a long-standing interest in and commitment to enhancing science education and career development at all levels. Evidence of these commitments include her service as a tutor for high school mathematics and SAT preparation, mentor for the American Society for Microbiology (ASM) Minority Mentoring Program and ASM Science Education Network, review panelist for the NSF Graduate Research Fellowship Program, consultant for the ASM Graduate and Postdoctoral Education Committee, and advisory board member for the UNC Postdoctoral Association.

As the Associate Director of Minority Affairs, Ashalla will develop and enhance the professional development training, academic and personal support, and community available through the Initiative to Maximize Student Diversity (IMSD) Program. Ashalla welcomes your input and assistance, so please feel free to contact her by email at ashalla@unc.edu.

Dr. Ashalla Magee Freeman

Where on Campus is That??

If you're one of the first ten PhD students to correctly identify the location of this picture on UNC campus you'll get a free king size candy bar! Email your guesses to pdb@unc.edu.

TIBBS-Sponsored Events in June

Wednesday 6/3, 12:00 - 1:00, Lunch with Gene Casale, Owner of Casagen Consulting.
3118 Neuroscience Research Building

Dr. Casale graduated in 1988 with a PhD in Physiology from UNC and then worked in Glaxo's clinical trials division for 14 years managing clinical trials. As time progressed he took on more and more of a regulatory writing role overseeing submission of new drug applications and clinical study reports to the FDA. Two and a half years ago he started his own consulting company to assist and advise pharmaceutical companies in the process of submitting reports and applications to the FDA. He will talk about his career path and can answer your questions about clinical trials management, FDA regulations, and his experiences as an entrepreneurial consultant. Lunch will be provided to those who register.

[Click here to register.](#)

Wednesday 6/10, 12:00 - 1:00, Lunch with Virginia Miller
Mary Ellen Jones 802

Dr. Virginia Miller, Professor of Genetics, Associate Dean of Graduate Education, and Director of the BBSP program, and Dr. Pat Brenwald, Professor of Cell and Developmental Biology, will discuss the related questions "I chose my lab - what next?" and "How do I navigate committee meetings?" Lunch will be provided.

[Click here to register](#)

Thursday 6/11, 12:00 - 1:00, Translational Medicine Lunch and Learn—How interdisciplinary science at UNC is addressing untet needs in Lupus research
Thurston-Bowles 3200

Dr. Barb Vilen, PhD, a basic science PI, and Dr. Rob Roubey, MD, a clinician, will discuss how they collaborate to improve our understanding of and treatment options for the autoimmune disease lupus. A lupus patient will initiate the discussion with a brief introduction of the disease, current treatment options and side effects, and what it is like to live lupus. Lunch will be provided starting at 11:45 to those who register.

Spotlight on the TIBBS website

The "[Career Center](#)" tab on the TIBBS website contains tons of information to help you explore career options at the bench or away from the bench. For example you'll find:

- Advice on finding a postdoc
- CV templates and resume advice
- Career profiles on:
- Science Policy
- Science Writing and Editing
- Medical Science Liaisons
- Scientific Consulting
- Tech Transfer and Patent Law

TIBBS-Sponsored Events in June

Thursday 6/11, 3:00 - 5:00, Essential Skills for Success in Industry, Session 2—Project Management Bondurant G100

In this session, industry panelists will discuss working in teams and managing teams, developing project plans, goals, and timelines, and managing resources effectively. Attendance is required to receive a certificate of completion.

[Click here to register](#)

Thursday 6/18 4:00—5:00pm, How to Build Your Network Using LinkedIn. Health Science Library 307.

In this hands-on workshop, Dr. Patrick Brandt will show attendees how to use the online professional networking tool LinkedIn. Tasks that will be demonstrated include how to take advantage of the untapped potential of LinkedIn Groups, how to add files to your profile, how to import contacts to build your connections, how to perform reverse employer searches to prepare for interviews, and many others. The workshop is limited to 30 participants and will be most effective if you have [registered for and started](#) your own LinkedIn profile prior to the workshop. [Click here to register](#)

Friday 6/19 12:00, TIBBS Social—LocoPops on the MBRB Lawn. Come out to the MBRB lawn to catch up with friends and enjoy some gourmet LocoPops!

Carolina Bioscience

Interview with a Tenure Track Investigator

A new interview with Dr. Angelique Whitehurst was posted to the [Carolina Bioscience](#) blog recently. Follow [this link](#) to read about Dr. Whitehurst's experience preparing for and applying to academic research positions. She also talks about starting salaries for assistant professors and gives some practical advice for graduate students and postdocs interested in careers in academia. She even gives specific advice for female scientists who have their sights set on a career in academic research.

Monday 6/22 5:00—7:00pm Meeting of the TIBBS Undergraduate Teaching Interest Group. Bondurant 1074.

Attendees will listen to and critique a mock lecture given by an assigned group member. A light dinner will be served. Please contact [Dr. Jackie Swanik](#) for more information.

Thursday 6/25, 12:00 - 1:00, Essential Skills for Success in Industry, Session 3—People Management Bondurant G100

In this session, industry panelists will discuss talent management, leadership skills, hiring, interviewing, and performance evaluations. Attendance is required in order to receive a certificate of completion. [Click here to register](#)

June 2009 Seminars (yes there are only three this month)

June 5th

“Fungal Infections” with Dr. John Perfect from Duke University. Held at 8:30 in the Pagano Conference Room, LCCC.

June 9th

“Breaking the Cycle: Investigating the intersection of health disparities and educational disparities” with Reginald Weaver, Bonnie Durah, Dr.P.H., Dian Catro, M.P.H., Ph.D., Nicholas Freudenberg, Dr.P.H. Held at 1:30 at Tate-Turner-Kuralt Auditorium, UNC School of Social Work.

June 12th

“Sexually Transmitted Infections - Clinical Trials Group (STI-CTG)” with Dr. Arlene Sena from UNC. Held at 8:30 in the Pagano Conference Room, LCCC.

WHAT YOU BROUGHT TO SEMINAR AND WHAT IT SAYS ABOUT YOU:

June 2009 Campus Events and Workshops (Page 1 of 4)

June 2nd

Molecule Construction and Design with Vector NTI with Thomas Randall, PhD This session will cover the in silico (Molecule Construction and Design) capabilities in Vector NTI; this is applicable to those using any current version of VNTI on PCs or Macs. Prior experience with Vector NTI is essential. This will be a two hour hands-on session with a laptop provided. A variety of examples in both "Construction" and "Design" will be covered to demonstrate the general features of these in silico cloning utilities. We will also go over the Gateway and TOPO cloning functions within VNTI. Held from 2-4 in Bioinformatics 2136. To register: http://bioinformatics.unc.edu/cgi-bin/dev/seminars.cgi?db=default&uid=&view_records=1&ID=* &mh=10&sb=5&so=ascend

June 3rd

PowerPoint: Tips & Techniques Topics covered include drawing tools, slide animations, headers and footers, slide masters, automated presentations, and more. Class time will also be devoted to answering your specific questions. After attending this workshop, you'll no longer have to ask yourself-"How did they get their presentation to do that?" Classes are held in 67 MacNider Hall from 12:00-1:00pm. To register <http://www.med.unc.edu/www/events/ppt-copy/view>

Lunch with UNC Alumnus, Gene Casale, President of Casagen Consulting Dr. Casale graduated in 1988 with a PhD in Physiology from UNC and then worked in Glaxo's clinical trials division for 14 years managing clinical trials. As time progressed he took on more and more of a regulatory writing role overseeing submission of new drug applications and clinical study reports to the FDA. Two and a half years ago he started his own consulting company to assist and advise pharmaceutical companies in the process of submitting reports and applications to the FDA. He will talk about his career path and can answer your questions about clinical trials management, FDA regulations, and his experiences as an entrepreneurial consultant. Lunch will be provided to those who register. This will be held from 12:00-1:00pm in Neuroscience Research Building 3118. To register: http://cfx.research.unc.edu/res_classreg/browse_single.cfm?New=1&event_id=22022

"Transition from UNC Postdoc to Professor" Round Table Discussion with visiting Professor, Paul Garris, Ph. D. Meet in the Atrium at Michael Hooker Research Center for coffee and pastries from 9:00-11:00am. To register: http://cfx.research.unc.edu/res_classreg/browse_single.cfm?New=1&event_id=22026

June 4th

Identifying Funding Sources for Graduate Research and Study The workshops include: fundamentals of graduate funding, tips for researching funding opportunities, hands-on instruction in the best use of online funding resources including the COS funding database and customizable alert service From 1:00-2:30 in 307 Health Sciences Library on south campus. To register: http://research.unc.edu/grantsource/workshops_help.php#workshops

June 9th

Introduction to Sequencher with Thomas Randall, PhD This session will be an overview of the basic tools available in Sequencher. Topics covered in this session: quality assessment of sequences, loading sequences into Sequencher, trimming sequences (vector, endtrimming, low quality ends), sequence assembly (assemble by name, assemble to reference sequence), edit contig, variance table, export the analysis result. This session will be hands on for those who use a Windows version of Sequencher although is applicable for Macintosh users. A laptop will be available for all attendees to use during the session. The session will be in room 3136 Bioinformatics building from 2:00-4:00 pm. To register: http://bioinformatics.unc.edu/cgi-bin/dev/seminars.cgi?db=default&uid=&view_records=1&ID=* &mh=10&sb=5&so=ascend

Photoshop I: Introduction Photoshop is a powerful imaging tool that lets you adjust and enhance images. In this class you will gain a comprehensive understanding of the Photoshop workspace environment and will be able to navigate with confidence into the myriad of menus and dialog boxes. You will also learn about the significance of different file formats, such as GIFs, TIFFs, JPEGs, and PSDs, when working with images for the Web or print. Our expert teachers will take the guess work out of this complex program with tips and techniques to help save you time and frustration. Classes are held in 67 MacNider Hall from 12:00-1:00pm. To register <http://www.med.unc.edu/www/events/photoshop1-copy/view>

June 2009 Campus Events and Workshops (Page 2 of 4)

June 9th (continued)

Aseptic Techniques The IACUC Aseptic Techniques class is a hands-on wet lab designed to teach students how to maintain sterility during survival rodent surgeries. This course is required for Laboratory Animal Coordinators who are members of labs that will be performing sterile rodent surgeries. UNC rodent users who will be performing sterile surgeries are encouraged to attend; otherwise training may be provided by a certified Laboratory Animal Coordinator. Prerequisites: Research Profile, Lab Worker Form, Animal Handler Form, and IACUC/DLAM on-line orientation (http://cfx3.research.unc.edu/iacuc_reg/). Held from 10:00-12:00 in Glaxo Room 148. To register: http://cfx.research.unc.edu/res_classreg/browse_single.cfm?New=1&event_id=22014

June 10th

Lunch with Virginia Miller. Dr. Virginia Miller, Professor of Genetics, Associate Dean of Graduate Education, and Director of the BBSP program, and Dr. Pat Brenwald, Professor of Cell and Developmental Biology, will discuss the related questions "I chose my lab - what next?" and "How do I navigate committee meetings?" Held from 12:00 - 1:00 in Mary Ellen Jones 802. Lunch will be provided. [Click here to register](#)

June 11th

Translational Medicine Lunch and Learn—How interdisciplinary science at UNC is addressing unmet needs in Lupus research. Dr. Barb Vilen, PhD, a basic science PI, and Dr. Rob Roubey, MD, a clinician, will discuss how they collaborate to improve our understanding of and treatment options for the autoimmune disease lupus. A lupus patient will initiate the discussion with a brief introduction of the disease, current treatment options and side effects, and what it is like to live lupus. Held from 12:00 - 1:00 in Thurston Bowles 3200. Lunch will be provided starting at 11:45 to those who register. [Click here to register](#)

Essential Skills for Success in Industry Session 2 - Project Management

In this session, industry panelists will discuss working in teams and managing teams, developing project plans, goals, and timelines, and managing resources and communication held from 3:00-5:00pm in Bondurant Hall G100. To register: http://cfx.research.unc.edu/res_classreg/browse_single.cfm?New=1&event_id=21867

June 16th

PCR Design in Vector NTI with Thomas Randall, PhD. This session will focus on the various PCR design operations available in Vector NTI (VNTI). Prior experience with Vector NTI is expected and necessary. The operations available for PCR design will be the main focus and examples of the most applicable types of PCR design in VNTI will be covered. Managing Oligos in the Oligo database will also be covered as will the use of the DNA Motif analysis tool. This session is applicable to all versions of VNTI currently being used but PC laptops will be used in the session. Some PCR Design options are not available on the Mac. The session will be from 2-4 pm in room 2136, Bioinformatics. To register: http://bioinformatics.unc.edu/cgi-bin/dev/seminars.cgi?db=default&uid=&view_records=1&ID=* &mh=10&sb=5&so=ascend

Photoshop III: Selections This class will teach you essential principles of not only how to make and modify selections but why they are so important. You'll learn how to use Photoshop's selection tools to manipulate areas of the image without affecting the entire image. You will also learn how to apply these selections to layers for greater flexibility in editing the image. Understanding the use of selection tools is essential to editing images in Photoshop. Classes are held in 67 MacNider from 12:00-1:00pm. To register <http://www.med.unc.edu/www/events/photoshop3-copy/view>

Dissecting a Clinical Trial Protocol (Beginner) This workshop will focus on the importance of the clinical trial protocol and how each section relates to other clinical trial activities such as developing clinical study plans/check lists, informed consent, budget development, data collection, and contract negotiations. Held from 1:30-3:30 in 1131 Bioinformatics. To register: http://cfx.research.unc.edu/res_classreg/browse_single.cfm?New=1&event_id=21829

June 2009 Campus Events and Workshops (Page 3 of 4)

June 16th (continued)

Rat Handling Class The Rat Handling and Techniques class is a hands-on wet lab designed to teach students basic techniques in rat handling including restraint, simple injections, bleeding techniques, anesthesia and euthanasia. This course is required for Laboratory Animal Coordinators in laboratories working with live rats. All other rat users on campus are welcome to attend; otherwise training may be provided by a certified Laboratory Animal Coordinator. Prerequisites: Research Profile, Lab Worker Form, Animal Handler Form, and IACUC/DLAM on-line orientation (http://cfx3.research.unc.edu/iacuc_reg/). In Glaxo room 148 from 10:00-12:00pm. To register: http://cfx.research.unc.edu/res_classreg/browse_single.cfm?New=1&event_id=22015

June 18th

How to Build Your Network Using LinkedIn. In this hands-on workshop, Dr. Patrick Brandt will show attendees how to use the online professional networking tool LinkedIn. Tasks that will be demonstrated include how to take advantage of the untapped potential of LinkedIn Groups, how to add files to your profile, how to import contacts to build your connections, how to perform reverse employer searches to prepare for interviews, and many others. The workshop is limited to 30 participants and will be most effective if you have [registered for and started](#) your own LinkedIn profile prior to the workshop. Held from 4:00–5:00pm in Health Science Library 307. [Click here to register](#)

Photoshop IV: Masks In this class you will learn the advanced skill of masking. Using layer masks you can nondestructively conceal parts of an image or an adjustment made to an image. With masks you can also isolate and manipulate specific parts of an image. Masks are convenient in that they can be edited repeatedly without permanently affecting the underlying image. Masks are a key component to creating photo collages. Classes are held in 67 MacNider from 12:00-1:00pm. To register <http://www.med.unc.edu/www/events/photoshop4-copy/view>

June 19th

12:00 noon, TIBBS Social—LocoPops on the MBRB Lawn. Come out to the MBRB lawn to catch up with friends and enjoy some gourmet LocoPops!

DNA and Protein Motif Analysis in Vector NTI with Thomas Randall, PhD. This session will focus both on the DNA and protein motif analysis operations available in VNTI. Prior experience with VNTI is expected and is absolutely necessary. How to do DNA/protein searches of the Explorer Database will be demonstrated. How to display motifs in AlignX alignments will also be covered. Managing Oligos in the Oligo database within VNTI will also be discussed as well as some graphics display focusing on the creation and manipulation of features. PC laptops will be used in the session. Some functions that will be discussed are not available on the Mac. The session will be scheduled for 2 hours. The session will be from 2-4 pmin room 3136 Bioinformatics. To register: http://bioinformatics.unc.edu/cgi-bin/dev/seminars.cgi?db=default&uid=&view_records=1&ID=* &mh=10&sb=5&so=ascend

June 22nd

Meeting of the TIBBS Undergraduate Teaching Interest Group. Attendees will listen to and critique a mock lecture given by an assigned group member. A light dinner will be served. Please contact [Dr. Jackie Swanik](#) for more information. Held from 5:00–7:00pm in Bondurant 1074.

June 23rd

ContigExpress in Vector NTI with Thomas Randall, PhD. This session will focus on the ContigExpress (CE) function in VNTI. Version 10.3 will be used. Prior experience with Vector NTI is essential. We will go over how to create and manage projects in CE. The managing and editing of both individual and groups of chromatographs will be covered. The various parameters involved in the assembly algorithm will be covered. From a group of chromatographs, we will assemble and edit a DNA contig that can be moved into Vector NTI. As the function of CE is very similar to Sequencher some of the pros/cons of these tools will be discussed. The session will be from 2-4 pmin room 3136 Bioinformatics. To register: http://bioinformatics.unc.edu/cgi-bin/dev/seminars.cgi?db=default&uid=&view_records=1&ID=* &mh=10&sb=5&so=ascend

June 2009 Campus Events and Workshops (Page 4 of 4)

June 24th

Mouse Handling Class The Mouse Handling and Techniques class is a hands-on wet lab designed to teach students basic techniques in mouse handling including restraint, simple injections, bleeding techniques, anesthesia and euthanasia. This course is required for Laboratory Animal Coordinators in laboratories working with live mice. All other mouse users on campus are welcome to attend; otherwise training may be provided by a certified Laboratory Animal Coordinator. Prerequisites: Research Profile, Lab Worker Form, Animal Handler Form, and IACUC/DLAM on-line orientation (http://cfx3.research.unc.edu/iacuc_reg/). Held from 10:00-12:00pm in Glaxo Room 148. To register: http://cfx.research.unc.edu/res_classreg/browse_single.cfm?New=1&event_id=22016

June 25th

Essential Skills for Success in Industry Session 3 - People Management In this session, industry panelists will discuss talent management, leadership skills, hiring, interviewing, and performance evaluations. Held from 3:00-5:00pm in Bondurant Hall G100. To register http://cfx.research.unc.edu/res_classreg/browse_single.cfm?New=1&event_id=21868

Photoshop V: Creating Web Graphics In the final installment of our Photoshop classes, you will learn to create images for use on the Web. This course will familiarize you with concepts and techniques required to optimize images for display on the internet. You will also learn about several graphic formats that are appropriate for Web images, and how to choose the best one for output. Classes are held in 67 MacNider from 12:00-1:00pm. To register <http://www.med.unc.edu/www/events/photoshop5-copy/view>

June 26th

Breeder Policy Lecture This course is required for all Principal Investigators and mouse handlers with breeding colonies. The one hour lecture reviews the Institutional policy concerning cage population densities: housing and breeding mice. Held from 10:00-11:00am in Glaxo Room 148. To register http://cfx.research.unc.edu/res_classreg/browse_single.cfm?New=1&event_id=22018

The Paintings of Eduardo Lapetina

The FedEx Global Education Center is pleased to host an exhibition of abstract paintings by Eduardo Lapetina. Argentinean artist, Eduardo Lapetina uses symbolic shapes and colors to express deep emotions and passions. He applies paint to the canvas by pouring, splashing, dripping, and scratching. His pieces, with layer upon layer of paint, create a sensuous and turbulent surface texture that is as vital and as complicated as life itself. Lapetina uses color to allure an imaginative and subtle spatial elusiveness.

THURSDAY JUNE 4TH

First Thursday Science Forum

The Nuclear Renaissance is the first topic to be discussed in this new series of roundtables that explores a science topic that's making headlines—or should be. Coffee, tea and cookies are provided as the conversation flows. Morehead Planetarium & Science Center - 250 East Franklin St - Chapel Hill (919) 962-1236 - [Website Free](#).

SATURDAY JUNE 20TH (Continued)

Herbarium Mount-a-Thon

Learn how botanical information is collected, stored, and used, while you help the UNC Herbarium mount specimens for permanent storage. An herbarium is a museum collection of plant specimens. Each specimen consists of a sheet of paper with a dried and flattened plant attached along with information on where the specimen was collected. The UNC Herbarium collection helps scientists and resource managers identify new weeds, the historical distribution of endangered plants, plants of state parks, national parks, seashores, riverways, and wildlife refuges, and much more. Such information is crucial to those interested in planning North Carolina's future as our state and region continue their fast-paced development. No experience is necessary; materials and training provided. No pre-registration necessary: just show up! 1:00 pm to 5:00 pm NC Botanical Garden **FREE**

Rory Block Concert

Hard to believe: It's been four years since she brought her Delta blues guitar playing here. Part of the 6th annual American Roots Series. The ArtsCenter - 300-G East Main St - Carrboro (919) 929-2787 - [Website](#) Public, \$19; members, \$17.
