Additional Comments:
I really enjoyed my experience at Saint Paul Hospital in Ethiopia. There were students from Emory University doing their fourth year research projects. The Saint Paul Millennium Medical College is also starting a residency program with a partnership from the University of Michigan. I learned so much clinically and was able to put faces to many of the disorders that I learned through out first year. The students were very cordial and inviting. They volunteered to translate so that I could get experience with the history and physical exam. I couldn't think of a better way to spend my summer and I think that this would be a great opportunity for future medical students. I hope to do an away rotation at St. Paul Hospital in my 4th year.
