Additional Comments:

I highly recommend this trip. Himalayan Health Exchange is very organized and coordinated all our airport pickups, transportation and meals very well. I never felt unsafe or insecure while on the trip. The villages that we helped were also very appreciative. This trip is a good way for students to supplement the general physical exam skills they learn in the first year in a very hands on way. Students get to participate in the entire process from taking histories, completing physicals, presenting to an attending, to learning what medications should be prescribed. Since this trip is not limited to UNC students, you get to work with medical students, residents, and attendings from all over the US and other countries.

Additional Comments:

the 7 UNC Student Health recommended vaccinations + medications I had to pay for were not necessary according to the US physicians that were on our trip. Hep A/B were necessary of course, but Typhoid <sup>and</sup> the altitude medication were not necessary. Perhaps more communication b/w Student Health and the HHE coordinators would remedy this. When I went to student health with HHE's med recommendations, the nurse assured me I needed more.
