Additional Comments:
The opportunity was great and would be greater if there is more hands on. I was able to utilize what I learned from this experience as early as the first week of my second year. I know it is a little bit hard to ask for as much hands on as I wish to in operating room, but a little more involvement and supervision maximize what someone get out of it. The experience also varies with a physician you travel with and who you meet there. Regardless, it definitely worths traveling.
