Spring 2017 Pathobiology and Translational Science Seminar Series

Tuesdays, 12:00 noon in 321 MacNider or G010 Bondurant
(Pizza will be served at 11:45)

January 17 – MacNider 321
James Byrnes - Advisor: Alisa Wolberg, PhD
Trans-regulation of hepatocyte factor XIII-B production by bone marrow cell-derived factor XIII-A

February 7 – Bondurant G010
Qiang Zhu - Advisor: Joan Taylor, PhD
Discovery of Novel Means to Mitigate Cardiac Necrosis

February 21 – Bondurant G010
Sabri Abdelwahab - Advisor: Mehmet Kesimer, PhD
The Pathophysiological Effect of E-cigarette on Airway Mucosal Innate Defense

March 21 – MacNider 321
Zachary Opheim - Advisor: Joan Taylor, PhD
TBD
Michael Henderson - Advisor: Nigel Key, MD
Indications of Multi Organ Dysfunction Syndrome in Acetaminophen Poisoning

April 4 – MacNider 321
Nichole Fleming - Advisor: Jiandong Liu, PhD
Understanding the role of Ring1b in second heart field development

April 18 – MacNider 321
Haley Vaseghi - Advisor: Li Qian, PhD
Metabolic Repatterning in Direct Cardiac Reprogramming

May 2 – MacNider 321
Bethany Batson - Advisor: Mehmet Kesimer, PhD
Airway Epithelial Response to IL13 in Normal and Severe Asthmatic Airways

May 16 – MacNider 321
Krystal Orlando - Advisor: Buddy Weissman, PhD
Epigenetic consequences of BRG1 loss in SCCOHT development

May 23 – MacNider 321
Sravya Kattula - Advisor: Alisa Wolberg, PhD
Contribution of Plasma and Platelet Factor XIII to Venous Thrombosis

May 30 – MacNider 321
Katie Stember - Advisor: Ron Falk, MD
Identifying Autoreactive T Cells and Pathogenic Epitopes in MPO-ANCA Vasculitis
