UNC Acute Inpatient Rehabilitation Center
N.C. Memorial Hospital, 7th floor
101 Manning Drive
Chapel Hill, North Carolina 27514
Nursing Station: 984-974-5666

UNC Rehabilitation Goals:
To optimize each patient’s physical function including:
- Self-care
- Mobility
- Speech
- Swallowing
- Bowel and bladder management
- Adaptation to disability
- Potential for vocational productivity

The UNC Health Care Rehabilitation Center is a 30-bed inpatient facility certified by the Joint Commission and has been awarded accreditation by CARF, the Commission on Accreditation of Rehabilitation Facilities. Come by and tour the facility, which is located on the 7th floor of Memorial Hospital on the UNC Hospitals Campus.
Our Rehabilitation Center treats individuals with a variety of conditions including but not limited to:

- Stroke
- Brain Tumor
- Transverse Myelitis
- Guillain-Barre Syndrome
- Brain Injury
- Spinal Cord Injury
- Amputation
- Burns
- Musculoskeletal Disorder
- Multiple Trauma

***Potential patients with commercial insurance and Medicare replacement plans will require authorization from their insurance company prior to admission.

What to expect at UNC Rehab

All rehabilitation patients at the UNC Rehabilitation Center are expected to participate in 3 hours of therapy each day.

After each appropriate therapist completes an evaluation and discusses your goals, an individual care plan will be developed.

Patients will receive a daily rehab schedule for therapy times provided.

A Physical Medicine and Rehab Physician will see each patient every day and 24 hour nursing care is provided.

Case managers will plan for your care at home before you are discharged.

Prior to discharge, we will schedule a training day with you and one or more of your caregivers/family members.

This training is essential for your follow up care at home. It will include equipment, therapy, wound care, medications management, and bowel and bladder management.

Families and friends are welcome to visit while you are here.
