

# The Conte EBDS Study

## Visit #3: MRI Appointment

Your MRI Study Appointment is: \_\_\_\_\_

Come to the **MR Research Center** (Radiology Research Laboratories Building) at **106 Mason Farm Road** on the UNC-Chapel Hill Campus. (The "106" is on the glass door of the building itself so it's hard to see from the street.) This building is on the corner of Mason Farm Road and Daniels St/West Drive. It is a single story building with blue/white siding with some red brick on it.

**Parking:** Our patient parking space has been moved to the East side of our building (across from the Bioinformatics Building). The space is marked with a pink "**MRI Patient Parking**" sign. Park here and walk around to the front of the **Radiology** Building and down the red brick steps to the glass door on the right. We will give you a permit for your automobile. If the **MRI Patient** parking space is occupied, please proceed to either the Dogwood Deck (located just before you come to the stop sign heading North) **or** ACC parking (located south of our building near Columbia Street). (We can provide parking coupons for you for either of these two locations).

**\*\*\*If you have any difficulty finding the Center, please call them at (919) 843-6194\*\*\***

### On the Date of Your Appointment:

(1) **For the MRI to succeed, your baby will need to be asleep** as we do not sedate. Please bring a bottle of formula if you are not breastfeeding to help with this process. Plan a feeding for the time of your appointment if possible.

(2) **Please be sure your child(s) clothing has no metal or metallic objects around the head or neck.** This includes metal snaps/buttons, safety pins, or hair ornaments as they can interfere with the pictures. If you plan to accompany your child in the Scan room, you will also need to remove jewelry, credit cards, pins, etc. as well.

Thank you.

Dianne Evans, Program Director, @ 919-843-2389 or 866-849-0541 (Toll free)
