We are pleased to invite applications for a fellowship program intended to train individuals who have completed urology residency for specialized careers in academic Urologic Oncology. This opportunity will offer a multidisciplinary exposure to the management of GU malignancies at the NCI-designated University of North Carolina Lineberger Comprehensive Cancer Center, integrated with exceptional opportunities for mentored career development in health services, clinical outcomes and translational research. The fellowship consists of a 2-year clinical and research program. A unique aspect of this program is the opportunity for motivated individuals to obtain a Master’s Degree (MPH or MS in Clinical Research) from our internationally recognized, top-ranked Gillings School of Public Health, without the requirement for an additional 3rd year. In addition, trainees in this program will be eligible to apply for support from the NIH Loan Repayment Program. (A 1-year program may be considered based on individuals’ particular interests and goals; such individuals are encouraged to inquire about such a tailored fellowship opportunity.)

UNC Chapel Hill is a high-volume regional and national referral center for patients with all types of GU malignancies. The Urologic Oncology surgical service is clinically busy, with an average of over 80 cancer cases per month — approximately 75% using robotic and minimally invasive techniques. Our faculty members are internationally recognized for their contributions to clinical and academic GU oncology, with a comprehensive portfolio of extramurally-funded programs in translational and health services research.

Fellowship Program Director
Raj Pruthi, MD, FACS
Professor and Chief of Urology
Division of Urologic Oncology

Fellowship Research Director
Matthew Nielsen, MD, MS, FACS
Assistant Professor of Urology
Adjunct Assistant Professor of Epidemiology

Program Faculty
Urology
Raj S. Pruthi, MD, FACS
Matthew Nielsen, MD, MS, FACS
Mathew Raynor, MD
Anjali Smith, MD
Eric Wallen, MD, FACS
Michael Woods, MD, FACS
Matthew Nielsen II, MD

Radiation Oncology
Ronald Chen, MD, MPH
Andrew Wang, MD

Genitourinary Radiology
John Hanks, MD

Interventional Radiology
Robert Douglas, MD
Joseph M. Stavas, MD

Pathology
William Pukk岂sonen, MD
Suzan Margaritis, MD
Gregory Busch, MD, MS

Medical Oncology
Matthew Milowsky, MD
Ethan Basch, MD
Paul Godley, MD, PhD, MPP
W. Kimryn Rathmell, MD, PhD

Young Wang, MD

William Funkhouser, MD
Susan Maygarden, MD
Gregory Bianchi, MD, MS

Urologic Oncology Fellowship

UNC Chapel Hill is a high-volume regional and national referral center for patients with all types of GU malignancies. The Urologic Oncology surgical service is clinically busy, with an average of over 80 cancer cases per month — approximately 75% using robotic and minimally invasive techniques. Our faculty members are internationally recognized for their contributions to clinical and academic GU oncology, with a comprehensive portfolio of extramurally-funded programs in translational and health services research.
The fully integrated Multidisciplinary GU Oncology clinic, which saw over 1500 new cancer patients in 2011-12, will be a core component of the clinical educational program, providing the fellow with on-site training in all aspects of clinical management for patients with urologic malignancies. New cancer patients are seen jointly with urology, medical oncology and radiation oncology faculty in the state-of-the-art North Carolina Cancer Hospital clinic. In addition to the core rotation, fellows will rotate primarily with GU medical and radiation oncology for two weeks in each specialty for in-depth training in the clinical aspects of these fields, and opportunities are available for rotation with interventional radiology, pathology, urology, and pathology, according to individual fellows’ interests.

**Comprehensive, Integrated GU Oncology Care**

**Excellent quality of life**

In addition to outstanding clinical and academic experiences supported by a collegial network of mentors and peers, the experience at UNC is enriched by a vibrant, progressive, desirable environment. The climate is pleasant, beach or mountain recreation a few hours away by car, and cost of living is reasonable.

The University of North Carolina offers extraordinary opportunities for career development in cancer-related outcomes and health services research. Formal postgraduate training in biostatistics, research methods, responsible conduct of research, and grant writing are available in a well-developed infrastructure for young clinician-researchers. A unique aspect of this Urologic Oncology Fellowship program is the opportunity for motivated individuals to obtain a Master’s Degree (MPH or MS in Clinical Research) from our internationally recognized, consistently top-ranked public School of Public Health in the country, without the requirement for an additional 3rd year. In addition, trainees in this program will be eligible to apply for support from the NIH Loan Repayment Program.

**Exceptional academic career development**

The fellow will have access to a variety of institutional and population-based state, national and international database for clinical research, supported by analytical and methodological collaborators from the Cancer Center and School of Public Health. Fellows will have the option to apply to the UNC-Cancer Care Quality Training Program, Cancer Control Education Program, and other postdoctoral programs. Alternatively, interested and qualified fellows have the opportunity to work in one of several extramurally-funded basic science laboratories run by program faculty in GU medical and radiation oncology. Fellows would have the option to apply for an additional third year of research under appropriate circumstances.

**Eligibility Requirements**

- The applicant for this training program must:
  - Be committed to a career in academic urology
  - Provide evidence of excellence in academic urology and other training
  - Be a graduate of Liaison Committee on Medical Education (LCME)-accredited medical schools in the US and Canada or international medical graduates of equivalent international medical school
  - Have completed United States Medical Licensing Examination Steps I, II, and III
  - Have completed or anticipate completion of an ACGME-accredited Urology residency program
  - Meet requirements and obtain a North Carolina medical license prior to commencing the program
  - Be a United States citizen or Visa eligible and able to provide proof of identity and United States Employment Eligibility (I-9)
  - If selected as a potential candidate for the Fellowship, the applicant will be required to fulfill conditions for UNC Faculty Appointment (Instructor level), including Health Record Clearance, including drug screening (see UNC Drug Testing Policy) and successful completion of the UNC Application for Appointment. (3 reference forms, criminal background check, drug check, and signature on confidentiality agreement)

**Application Process**

By April 1 of the year preceding the final year of residency, applicants should send a CV, personal statement, and two letters of recommendation to:

Tryston Jack
Education Coordinator
Division of Urologic Surgery
University of North Carolina
2113 Physicians Office Bldg CB 7235
Chapel Hill NC 27599-7235
Phone (919) 966-2574
Fax (919) 966-0098
Email Tryston_jack@med.unc.edu

By April 1 of the preceding year, the application must meet the eligibility requirements and be submitted by the indicated deadline.
