IDEA The Individuals with Disabilities Education Act (IDEA) was enacted “to ensure that all children with disabilities have available to them a free appropriate public education that emphasizes special education and related services designed to meet their unique needs and prepare them for further education, employment, and independent living.” (IDEA §300.1)

APE (IDEA §300 A 300.39 a 1 ii) Adapted physical education or specially designed instruction in physical education is a direct instructional service which individualizes the physical education curriculum according to a student’s unique need. It is the only direct, instructional service specified in IDEA legislation. “(1) Special education means specially designed instruction, at no cost to the parents, to meet the unique needs of a child with a disability, including—(i) Instruction conducted in the classroom, in the home, in hospitals and institutions and in other settings; and (ii) Instruction in physical education.

SBPT (IDEA §300.32) Physical therapy, as a related service, is provided “to assist a child with a disability to benefit from special education.” Since physical therapy services is delivered in a variety of settings (hospitals, clinics, home, school, etc.), questions often arise as to the role physical therapists (PTs) play in the school setting. In public schools, Physical therapists assist students to access school environments, participate throughout the school day & benefit from their educational program.

This fact sheet aims to clarify the roles of adapted physical education and physical therapy services for educational benefit under IDEA. Similarities and differences between these disciplines are discussed to serve as a guide for school administrators, teachers of general and special education, related service providers, students, parents and guardians. Please note that these are general guidelines; readers should familiarize themselves with the policies of each state or local education agency (LEA), as requirements and regulations may vary.

APE and SBPT:

- There is confusion with administrators, students, parents/families, GenEd & SpEd instructional staff and related service providers due to overlapping areas of practice & expertise
- Related services (PT) support Special education (APE)
- PT & APE provide different perspectives on similar areas of student development
- Not interchangeable, APE cannot supplant SBPT or vice versa
- Sometimes improvements in motor development cannot be attained by a physical educator using the usual time allotments, methods or activities associated with PE
- Sometimes fitness or endurance improvements cannot be attained by a physical therapy related service using the customary service delivery, dosing and interventions. (adapted from Winnick, 2010)
Similarities and Differences
Between Physical Therapy and
Adapted Physical Education Services

**Purpose:**

**SBPTs**

Diagnose & manage movement dysfunction. PTs work to restore, maintain & promote physical function, wellness and fitness. PT interventions prevent the onset, symptoms, and progression of impairments, functional limitations & disabilities resulting from diseases, disorders, conditions, or injuries.

**Both APE and SBPT:**

Both work to improve student participation and motor development.

Both address fitness and promote healthy behaviors.

**APE Specialists**

Develop & implement a specially designed physical education instructional program (developing physical & motor fitness; fundamental motor skills & patterns; skills in aquatics, dance, individual & group games & sports) for an individual with a disability, based on a comprehensive assessment and unique student need.

**Work:**

**SBPTs**

School Based Physical Therapist’s are licensed, medical professionals who use therapeutic techniques to correct, facilitate, or adapt the student’s participation & movement/motoric performance within and access to the educational setting.

**Both APE and SBPT:**

- Help Students increase activity and participation
- Work collaboratively with teams, set goals, & monitor progress with regular reporting
- Adhere to state policies, licensure laws & professional standards
- Educate and empower students, teams, & families with community activity suggestions, health promotion & wellness
- Provide services based on student needs, not administrative convenience.

**APE Specialists**

Educators licensed in the PE curriculum who may also have certification in Adapted PE (CAPE). APE specialists use differentiated instructional techniques to improve student’s movement performance/fitness and ensure progress through the PE curriculum.
Similarities and Differences Between Physical Therapy and Adapted Physical Education Services

**Areas Addressed:**

- PE Curriculum
- Student Engagement
- Social Skills
- Specific Motor Patterns
- Sensorimotor Integration
- Aquatic Skills
- Dance Skills
- Skills for individual & group games (including intramural & lifetime sports)

**Both APE and SBPT:**

- Participation
- Safety
- Object Control Skills
- Functional Skills
- Play
- Sport & Game Skills
- Use of Equipment & Assistive Technology
- Leisure/Recreation Activities
- Motor Development, Skills & Coordination
- Fitness (e.g. strength, endurance)
- Sensorimotor Coordination

**SBPTs**

- Environmental Adaptations/accessibility
- Access (to campus, programs & activities)
- Body Function (e.g. pain, CV capacity, efficiency)
- Pre-vocational/Work Hardening
- Postural Balance and Stability
- Functional Mobility/Transfer
- Motor Planning
- Selection & management of equipment/assistive technology

**Qualifications, Roles, & Responsibilities**

- Therapist in education
- Related service
- Educator
- Direct, educational service
- Licensed in physical education by SEA
- APE services may be provided by General Education PE teacher (varies by state)

**Both APE and SBPT:**

- Itinerant
- Poorly understood
- Experts in gross motor development & movement
- Possible specialty certification (CAPE for APE; PCS for SBPT)
- Varied professional degrees (BS, MS, DPT, PhD)
- Supervision usually from outside discipline
- High requirement for collaboration
- Provide continuum of services/Implementing in LRE

**APE Specialists**

- Certified by Board (state) examination
- Licensed by the state
- Services can be reimbursed by Medicaid
**Collaboration between APE & SBPT**

### Appropriate
- Integrated student goal(s)
- Provide SBPT within PE or APE class routines
- Individual Transition Plan, especially identifying and/or developing community options for lifelong fitness, recreation, & leisure
- Problem solving difficult, challenging, & complex issues with participation, engagement, and physical activity.
- Special projects, programs, or initiatives

### Inappropriate
- SBPT provides APE assessment to IEP team
- SBPT provides APE recommendations to IEP team
- SBPT develops student goal(s) addressing PE curriculum
- SBPT provides APE services

### Appropriate if NO APE specialist or APE provided by PE teacher
- SBPT collaborates with PE teacher on APE assessment for IEP team
- SBPT collaborates with PE teacher to provide APE recommendations to IEP team
- PE teacher consults, as needed with SBPT or other IEP team members to develop student goal(s) addressing PE curriculum
- PE teacher consults, as needed with SBPT or other IEP team members, to provide APE services

---

**Take Home Messages:**

While the areas addressed by adapted physical education and school-based physical therapy overlap; they are distinctly different disciplines.

SBPTs, unless they possess a valid/related teaching credential, should not provide physical education (Adapted or General) evaluation or instruction.
