

Shape Activities

Using the shapes provided on the second page you can do these activities with your child(ren) to help them recognize shapes and learn their names.

- Go on a shape hunt inside and outside of your house.
- Use chalk to draw the shapes outside.
- Mark off the shapes with tape and have your child trace or color within the lines with chalk.
- Using objects around your house build the shapes with your child. (Ex. Q-tips, pencils, crayons, sticks, rocks, legos)
- Talk about how the shapes look. (Ex. Straight lines, curves, how many sides)
- Collect items in various shapes and talk about what you found.
- With the shapes drawn outside your child could move between them, saying their names as they do. You could also call out shape names and let your child jump to the correct one.
