

NADIA SUBJECT CODING SYSTEM

Primary Key (NADIA ID) for each animal composed of

- three letter initial of the project PI
- a unique integer less than 9999 for the experiment number.
 - PI can decide what constitutes an experiment
- Each animal used in an experiment will be described by an integer less than 9999.

Example:

Animal 7 from Cindy's lab used in experiment 5 will have NADIA ID CLE_0005_0007.

- The exact format of a primary key is important to link results
- You can also have your own lab ID

Padded numbers are important so that partially erased numbers will be known to be invalid.
