

# Academy of Educators

## ANNUAL REPORT 2018-19

Under the leadership of President Amy Shaheen, MD, MSc and the inaugural Leadership Council, the Academy's presence, programming, and scholarship output have substantially grown. Changes such as adding the Leadership Council and task-oriented sub-committees, strengthening connections with Area Health Education Center (AHEC) sites, and enriching programming have laid the foundation for a transformative year. As a result, the Academy has experienced increased member engagement, collaboration, and institutional knowledge sharing.
