

BIOC 652: Macromolecular Dynamics

Course description: This course is the last of the three modules required for the biophysics training program. Students will explore the topics covered in this course in four blocks.

- **Block 1**
 - Rates of molecular processes
- **Block 2**
 - Enzyme kinetics
- **Block 3**
 - Diffusion/transport and protein/RNA folding
- **Block 4**
 - Single molecular techniques and experiments
