

# SUPER STEWARD AWARDS

Antimicrobial stewards represent many disciplines. Super Steward Awards recognize colleagues' meaningful contributions to support the appropriate and effective use of antimicrobials, regardless of their role.

Awardees will demonstrate leadership in one or more ways, for example:

- Routinely modeling judicious antimicrobial use
- Engaging in innovation / quality improvement related to conserving antibiotics
- Preventing infections
- Avoiding unnecessary tests that could lead to antibiotic overuse
- Providing mentorship + education

## NOMINATION IS EASY!

Complete a short nomination form at <https://go.unc.edu/stew> by April 15, 2026. Nominees must be employees of UNC Hospitals or the University and not CASP staff. Awardees will be recognized with a token of thanks.
