Two CMEP Providers Receive Awards

Two of our long term and esteemed medical providers have received awards for their service to children. Dr. Howard Loughlin and Dr. Cindy Brown have been honored for their outstanding dedication to children.

Dr. Howard Loughlin received the Outstanding Service Award from the National Children’s Advocacy Center at their annual meeting in Huntsville. Outstanding Service Awards were given in the following areas: Multidisciplinary Team, Prevention, Victim Advocacy, Medical, Prosecution, Mental Health and Law Enforcement. Dr. Loughlin’s award was for service in the area of Medical.

Congratulations Howard and thank you for your dedication to children.

Dr. Cindy Brown was honored by the Western North Carolina Psychological Association (WNCPA) with The William Bruce Award. This award is given annually to a physician and a psychologist. The WNCPA believes that the best mental health care is the product of collaboration among the physicians, psychologist and patient . In 1996 the group decided to honor a psychologist and a physician who were intimately engaged in the art of collaboration. As you know, Cindy is intimately involved in her community and has been instrumental in bringing all professions to the table to provide better services to kids.

Congratulations Cindy and also a thank you for your dedication to children.

CREDENTIALING FOR CMEP

Medical providers are required to have 10 hours of continuing education in child abuse & neglect every two years to remain credentialed with the program. These hours do not have to be Category 1 CME. We have developed a document that will provide you with online resources for containing free continuing education hours for the purposes of meeting our needs. You may request this document at any time but it is also mailed to providers when their credentialing is about to expire.

Please feel free to submit any of the education on child abuse & neglect that you have attained through other conferences, meetings, inservices, etc. We will record those hours in our database.

We also provide 1 hour of continuing education for attendance at our monthly webinars. Unfortunately, we are not able to award Category 1 CME as we have done in the past. We are still working on this with the School of Medicine.
