FEEDBACK

A Newsletter of the Child Medical Evaluation Program

LAKE JUNALUSKA COMING SOON. BE SURE TO ATTEND

LETTERS OF AGREEMENT

We have mailed the letters of agreement to all of our providers in early August. Please sign and return the letter to the CMEP office as this detail is necessary in order to remit payment for CMEP paid evaluations. If you did not receive a Letter of Agreement, please call us at 919-843-9365. Thank you for another year of taking care of vulnerable kids.

CREDENTIALING FOR CMEP

Medical providers are required to have **10** hours of continuing education in child abuse & neglect every two years to remain credentialed with the program. These hours do not have to be Category 1 CME. We have developed a document that will provide you with online resources for containing free continuing education hours for the purposes of meeting our needs. You may request this document at any time but it is also mailed to providers when their credentialing is about to expire.

Please feel free to submit any of the education on child abuse & neglect that you have attained through other conferences, meetings, in-services, etc. We will record those hours in our database.

We also provide **1** hour of continuing education for attendance at our monthly webinars. Unfortunately, we are not able to award Category 1 CME as we have done in the past. We are still working on this with the School of Medicine.

UPCOMING TRAINING

Please periodically check our website for upcoming trainings <http://www.med.unc.edu/cmep/services/cmep-training>

Lake Junaluska Conference

The **19th Annual Symposium on Child Abuse and Neglect & CACNC Child Medical Training** is scheduled for September 24-26, 2012 at Lake Junaluska, near Waynesville, NC. We feel we have an exciting agenda for both the MDT and the Medical Training. Topics for the Medical Training will include *sex trafficking, exam techniques for anal and genital findings, the child protection process, medical and mental health impacts of human trafficking, medical photography, medical assessment of sexual abuse and assault in older children and teens, and a literature review*. Check the Child Advocacy Centers of NC website: cacnc.org for more information about the training.
