

STRESS-FREE CORE FACILITY MANAGEMENT

Agilent
CrossLab

From Insight to Outcome

Agilent CrossLab iLab Operations Software

Frustrated with inefficient lab research and administration? Now you can establish a shared platform that helps your institution realize the full benefits of its core operations investment.

Put easy-to-use, online research management tools at your fingertips with Agilent iLab Operations Software

iLab Operations Software—now part of the Agilent CrossLab family—is an enterprise web-based management software designed to support operations for centralized labs and shared research resources. The research management tools built into iLab Operations Software enable your organization to:

- Streamline reporting and increase transparency for equipment usage, budgeting, and forecasting
- Increase compliance and create auditable logs of quote approvals, services delivered, and invoicing
- Shorten billing cycles and increase recharge capture
- Raise awareness of available resources

In addition, iLab Operations Software offers advanced modules to support specific scientific workflows—such as sample submission, stock rooms, patient studies, equipment lock-out, and more.

Create a custom management solution with specialized modules and integration options
