Introducing:
UNIVERSAL PRECAUTIONS

When interacting with patients, all staff and patients must wear a mask.

If the patient is unable to wear a mask staff must wear:

1. Mask
2. Eye protection*
   - face shield
   - face mask with attached face shield
   - safety glasses
   - safety goggles

* Reusable eye protection (face shield, safety glasses and goggles) should be wiped with an EPA-registered disinfectant after each shift or when worn in an isolation room. Discard when broken or damaged.

Special Airborne/Contact Precautions still apply for patients infected with COVID-19 or for symptomatic patients under investigation for COVID-19.
