## CITI Training: More Than Just HSP and GCP!

Training Opportunities from the Collaborative Institutional Training Initiative

### UNC-CH CITI Program Institutional Courses

Completion of the Human Subjects Protection (HSP) module from the Collaborative Institutional Training Initiative (CITI) is required to conduct human subjects research at UNC, but did you know that there are many other training modules available?

All UNC-CH faculty and staff with valid ONYEN credentials have access to the following courses on the CITI website:

- Human Subjects Protection (HSP)
- Good Clinical Practice (GCP)
- Responsible Conduct of Research
- Clinical Trial Agreements
- Clinical Trials Billing Compliance
- CRC: Foundation

- CRC: Advanced
- Good Laboratory Practice
- Essentials of Grant Proposals
- Essentials of Research Administration
- Research Design
- Additional Elective modules

### Check out these Highlighted Modules!

The Clinical Research Coordinator (CRC) courses provide foundational and advanced role-based training for clinical research that expands beyond but is directly connected to the HSP and GCP courses. The CRC Foundations course is designed for new CRCs, while the CRC Advanced course is aimed at CRCs who have experience in human subjects research. Two CRC Advanced modules are highlighted below:

- **Project Management for Clinical Trials:** This module provides a succinct overview of project management principles, how the principles can be applied to managing clinical trials, and how using project management methodologies can increase trial efficiency by minimizing omissions and redundant activities. This module also discusses tools that CRCs can use to help manage a clinical trial.

- **Preventing and Identifying Misconduct and Noncompliance:** This module describes the CRC's role in preventing and identifying misconduct and noncompliance in clinical research, and provides strategies for investigating issues, performing a root cause analysis, and creating a Corrective and Preventative Action (CAPA) plan.

To begin any of these courses, login to the CITI website using your ONYEN, and click "add a course". For further information regarding CITI program training requirements, please visit the UNC-CH CITI Program Training Information Webpage.
