

News from the **RESOURCE HUB**

To take the *paper* out of your *paperwork*, we are excited to release an electronically fillable PDF version of the Informed Consent Self-Assessment.

Fillable Informed Consent Self-Assessment Form

Earlier this year, we released the Informed Consent Self-Assessment tool to enable study teams to proactively evaluate their informed consent process to identify strengths and opportunities for improvement. To enhance user experience and boost efficiency, we have developed a fillable version of the Informed Consent Self-Assessment. The new fillable form includes the following features:

- Data entry on desktop and mobile devices
- Tooltips to facilitate data entry
- Automated calendar controls to select the proper date
- Drop-down lists with predefined choices to reduce entry error
- Radio buttons for easy and quick scanning and selection
- Digital signature
- Editing – allows assessor to save progress and return later
- Email sharing among team members

Take a moment to explore the new version!
