- Training clubhouse staff
- Technical assistance
- Recruiting healthcare providers for training
- Training healthcare providers

OUTPUTS

- Description of members’ smoking history, characteristics, clubhouse
- # of policy assessments
- # of staff trained
- # of lead members trained
- Member wellness curriculum implemented:
  - # participating in 1+ session(s)
  - # participating >5 sessions
- # TA meetings
- Providers completing training:
  - # web-based
  - # starting
  - # completing
  - # in-person

OUTCOMES

SHORT-TERM

- Increased interest in policy change

INTERMEDIATE

- Strengthen clubhouse policies
- Increased pharmacotherapy for cessation use
- Decreases in cigarettes smoked in past 7 days
- Increased quit attempts
- Increased quit rates

LONG-TERM

- Determine feasibility and outcomes of clubhouse intervention to reduce tobacco use among members
- Project implementation and evaluation
- Decreased tobacco related morbidity and mortality

OUTCOMES

- Increased interest in policy change
- Increased self-efficacy
- Increased interest in quitting
- Increased provider self-reported plans to incorporate tobacco cessation pharmacotherapy and counseling

STRENGTHEN CLUBHOUSE POLICIES

- Increased quit rates
- Decreased tobacco related morbidity and mortality

DECREASES IN CIGARETTES SMOKED IN PAST 7 DAYS

- Increased interest in quitting
- Increased provider self-reported plans to incorporate tobacco cessation pharmacotherapy and counseling

DECREASED TOBACCO RELATED MORBIDITY AND MORTALITY

- Increased interest in policy change
- Increased self-efficacy
- Increased interest in quitting
- Increased provider self-reported plans to incorporate tobacco cessation pharmacotherapy and counseling

DECREASED TOBACCO RELATED MORBIDITY AND MORTALITY
