

Full Spectrum Profiling™ - Flow Cytometry with the Cytek Aurora

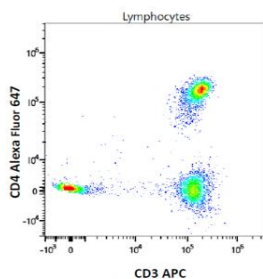

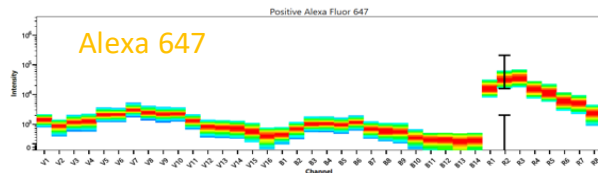

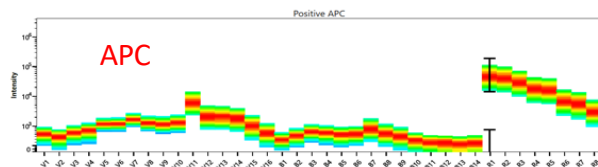

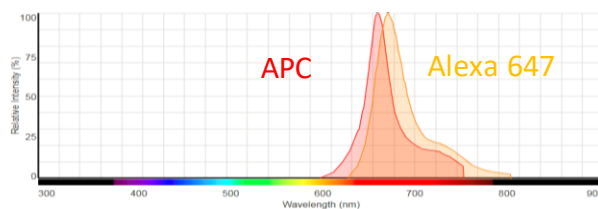

Seminar by Theresa Persiani, Technical Sales Rep Cytek Biosciences

www.cytekbio.com

Cytek Biosciences is pleased to offer the Cytek Aurora System. This novel flow cytometer expands the breadth of applications that are currently available on conventional cytometers. The system incorporates a new technology that maximizes the benefits of spectral flow cytometry. Please join us for a seminar where the following topics will be discussed:

- Why do spectral flow cytometry?
- Main differences between conventional and high-resolution spectral flow cytometry
- How to achieve high resolution spectral flow cytometry
- Instrument setup considerations
- Fluorochrome options
- Panel design considerations
- Multicolor data examples

Gated on lymphocytes

Spectral cytometry allows you to run fluorochrome combinations together

September 7th 2-4PM
LCCC Pagano Conference Room
