

CONFERENCES & MEETINGS

GRAND ROUNDS
Thursday, May 19, 2005, 7:30 AM
Clinic Auditorium

Romulo Colindres, M.D.
Professor, Nephrology
George A. Stouffer, M.D.
Professor, Cardiology

Renal Artery Stenosis

FROM DIVISIONS

- **Walter Tan**, M.D., Assistant Professor of Medicine and Radiology, was one of 36 faculty members successfully obtained a spot on the UNC Tar Heel Bus. The Tour is a five-day trip across North Carolina that gives new faculty members a head start on learning about the state they serve.
- **Paul Godley**, M.D., Ph.D., Associate Professor of Medicine, was one of 20 recipients nationwide of NIH grants for the Community Networks Program. Dr. Godley's grant will fund the Carolina Community Network, a project to increase the use of cancer interventions in underserved communities.

ANNOUNCEMENTS

- Over the last several months we have been in the process of recruiting a new Chief Administrative Officer for the Department of Medicine. I am pleased to announce that Bruce Wicks has accepted this position. He will take over the position from Keith Gran, effective August 1, 2005.

Bruce has a diverse educational and professional background. He graduated from Cornell University with a B.S. in Biology, and from Duke University with a Masters in Health Care Administration. Bruce has been at the University of Virginia since 1989, in a variety of roles including administrative positions for pediatrics and for the children's medical center.

Please join me in welcoming Bruce to the Department of Medicine. We are very fortunate to have recruited him, and we feel confident he will maintain the high standards set by Keith.

FROM THE CHAIR'S OFFICE

At the retreat on May 3, Bob Marriott gave a space overview. It's always tough to get a feel for space in the abstract, so I thought it would make sense to go over what our current space was, in

May 2002, what it is now, and where it will be by next January. You will all probably want to look at the space that involves you, but you can also look at the bottom of the table to see cumulative space for the DOM. One of the great things that will happen by January is the opportunity to relocate some of our faculty and staff from off-campus space to on-campus space with some of the moves that will be occurring. At that point, we will be mainly on-campus except for off-site clinic space which is located away from the main campus by design.

I hope this information is of interest to you. If you have questions, I would say to "ask Rosemary" but since she is now at Columbia in NYC, that isn't too practical. Bruce Wicks, our new DOM administrator (see above) will start this summer and he will be taking on our space issues as part of his primary activities.

Building	May 2002 NSF	Mar 2005 NSF	Jan 2006 NSF
