

Tips for Implementing ASAP as a Team

Schedule regular team meetings

Try to schedule meetings

- Before or after school
- During planning time
- During naptime
- Or find a sub to cover the class

Collaborate to ensure students receive the recommended intervention dosage

Intervention Dosage:

- 40 minutes of focused practice across the week
- Generalized practice should be embedded in classroom activities

Make a plan

- *Who* is working on focused and generalized practice?
- *When* is the practice taking place?
- Do what makes sense for your classroom

Consider your team members strengths

Think About... **Which team roles complement your team members' individual skills?**

- Who is good at planning?
- Who likes taking data?
- Who is a natural at pretending with children?
- Who has opportunities to work on focused practice?

Ongoing communication about implementation and student progress

- Keep shared notes or leave notes for each other
- Try using shared web-based platforms (e.g., Google Drive, Teams)
- Even quick “on-the-fly” chats can help
- Work together to review data and select child goals
- Talk about strategies, materials, and activities that have worked well (or not!)
