

INSTRUCTIONS

Please document all feedback in [the Review Form](#).

The [Primary Reviewer](#) will present the assigned application to the review committee.

The [Secondary Reviewers](#) will provide any additional information including opposing opinions to the review committee.

Please evaluate the overall impact of the proposed project considering the following six factors:

1. Likelihood of sustainable improvement in clinical care and outcomes
2. Potential for developing clinician capacity to lead healthcare improvement.
3. Impact on quintuple aim (equity, patient experience, population health, clinician and care team member satisfaction, and cost stabilization or reduction)
4. Planned use of interdisciplinary team and high-performance management strategies (visual management boards, huddles, SAFE reporting, Teams STEPPS, Just Culture principles)
5. Clarity of the improvement strategy, and alignment with system priorities
6. Accreditation requirement

Score each of the six factors, as well as overall impact, on a 1-5 scale (1=exceptional, 5=poor).

The overall impact score is not an average of the scores of the six factors. Your impression of overall impact takes the factors into account but reflects your gestalt of the project's impact.

Comment on strengths and weaknesses. Specific details are more helpful than general comments.
