

# Pain in Hands

## *Photography*

BY JIWOO LISA KIM

ISSUE 14 | WINTER 2023 | SPRING 2024

This piece endeavors to illustrate the multifaceted ways in which pain can be conveyed solely through our hands. Through “Politics of Pain,” a Social and Health Systems course in which we discussed all forms and perspectives of pain, I had the chance to take a deeper dive in to how pain has been portrayed historically and socially. Expressing pain has always been complex and expansive; visual expression of pain has been introduced as a way individuals can articulate and share their pain. With the help of my classmates, Diana Sanchez, Jayla Calhoun, Meghana Patel, and Stef Gonzalez, I had the opportunity to capture just a few of the many ways our hands can convey the spectrum of human pain.
