COURSE DESCRIPTION

This educational activity will provide a refresher on optimal treatment of various cardiovascular diseases. Also, new technologies and drug therapies will be discussed. Challenging cases will be reviewed to put current treatment recommendations in perspective. Lastly, panel discussions will be held and questions solicited from the audience.

LEARNING OBJECTIVES

Upon completion of this educational activity, the participant will be able to:

1. Identify and integrate various state-of-the-art treatments for cardiovascular disease, including percutaneous and surgical therapies, by primary care physicians and cardiologists.
2. Review state-of-the-art diagnostic techniques and imaging options for assessing patients with cardiovascular disease.
3. Review important clinical trials in cardiology that have been completed within the past year, including but not limited to cholesterol-lowering drugs and apply information learned to daily practice.

TARGET AUDIENCE

Cardiologists, cardiac surgeons, internists, family practice and primary care physicians, emergency physicians, nurses, nurse practitioners, physician assistants and other health professionals involved in the treatment of cardiovascular disease.

* NEW THIS YEAR *

UNC Center for Heart & Vascular Care is pleased to present an Echo Satellite Symposium break-out session to be held on Saturday morning 10/20 from 8a - 12p during the Cardiovascular Update.
