DEI Statement

I strongly believe that we should all work towards improved diversity, equity and inclusion in higher education, the medical field and our society as a whole. As an Infectious Diseases physician, I have the privilege to often serve underrepresented groups and my role is to provide the best possible care for these patients tailored to their needs and cultural beliefs and be a strong advocate for their wellbeing. I strive to be culturally humble and educate myself on issues relevant to DEI. I have received training on implicit bias and have taken a number of different Implicit Association Tests.
