

2022 MMRRC-UNC Parasite PCR Health Report

Building: Genetic Medicine

Location: Lower Basement, Suite 30

Date of Issue: 2/22/2023

Date Location First Occupied: 8/1/10

Housing Type: IVC

Report#: 104638-2023

Species: Mouse

Testing Laboratory: IDEXX BioAnalytics

As of June 2022, IVC (Individually Vented Cage) racks are tested 3xs/year by EAD (Exhaust Air Duct) Sampling & PCR analysis for internal and external parasites by our institutional vet services.

This report summarizes the results of tests performed on swabs of cage rack filters from each of our 3 mouse room in the MMRRC-UNC barrier-maintained production facility. Note data are reported as positive tests/total tests performed and swabs from multiple racks within a room are pooled. Current positive results are bolded. Please contact the MMRRC-UNC at mmrrc_health@med.unc.edu with questions about this report or animal health issues.
