**COVID-19 RAPID RESPONSE GUIDE**

| RECOGNITION | Bedside team recognizes problem and calls for a Rapid Response  
|             | Make sure to indicate this is a COVID patient (or PUI)  
<table>
<thead>
<tr>
<th></th>
<th>Ensure patient and family are wearing mask</th>
</tr>
</thead>
</table>
| FLOOR RESPONSE | Establish point of contact in and out of room (Room Phone / Vocera / Marker)  
|             | Identify Roles  
|             | Bring CODE CART to patient room [If CODE, bring CODE CART INTO room]  
|             | Bring COVID BVMs with HEPA filters to patient room  
|             | Setup HANDOFF TABLE, use med trays or emesis basins  
|             | If COVID PPE needed, use unit stock and/or call House Sup |
| PICU RESPONSE | Ideally PICU attending responds, and if possible 2 PICU nurses  
|             | Bring video laryngoscope to all COVID RAPIDS - with COVID supplies bag attached  
|             | Bring rolling cart with Baby Monitor |
| PICU ARRIVAL | Identify / Clarify Roles (both inside and outside room)  
|             | PICU Attending enters room with baby monitor +/- PICU RN1  
|             | SBAR signout |
| RAPID MANAGEMENT | Keep door closed as much as possible, use basins/trays for supplies handoff  
|             | Use Communication Personnel for supplies request, vitals  
|             | Minimize personnel in room, especially when intubating or bagging  
|             | If significant supplies needed, bring CODE CART into the room |
| PICU TRANSER | Notify House Supervisor of impending transfer of COVID + patient (or PUI)  
|             | Minimize staff needed for transport  
|             | Transport staff to remain Donned in appropriate PPE  
|             | Debrief after RAPID |

Guidelines Only: Use clinical judgement and available resources
