CENTER FOR EXCELLENCE IN COMMUNITY MENTAL HEALTH

IMPACT REPORT 2020-2022

Our mission is to promote the recovery of persons with mental illness in North Carolina through evidence-based and cost-effective prevention, treatment, training, research and community education.

Generous donors help to improve clozapine treatment and education in North Carolina.

The North Carolina Clozapine Network was created to help increase the use of clozapine treatment in NC. The Center was also able to purchase a point-of-care hematology analyzer to support patients taking clozapine.

80
**Percent Reduction of
Encompass Client ER Visits**

MAHEC collaboration expands CECMH services in western North Carolina.

- Mitchell & Yancy counties: 1st episode psychosis program
- Asheville: NCCN clozapine clinic

The Center will provide support for program development, education, clinical supervision, and clinical consultations.
