

# E-PROMPT

## Early Psychosis Resources: One-on-One Mentoring and Professional Training

**What is E-PROMPT?** A free education and mentoring resource available to any clinician in North Carolina interested in early psychosis care education.

**How does it work?** You submit a question via the online submission form and an expert will respond within 3-5 business days with education and resources tailored to your question. You may also be prompted to sign-up for a virtual office hours meeting for a more extended conversation with an E-PROMPT specialist.

**What can I ask?** Anything related to caring for the early psychosis population! Some examples include:

- What is coordinated specialty care and how do I refer?
- Guidance on the medical work-up for early psychosis
- Information on the differential diagnoses of causes of early psychosis
- Guidance on recommended screening and monitoring tools

**Ready to ask a question?** Visit <https://go.unc.edu/EPROMPTQS>
