RE: Increase in Radiology Clinical Research Service Center Core Rates

This memo is to inform you that the University's Office of Sponsored Programs has conducted a review of our rates. The Radiology Clinical Research Service Center Core functions as a research service center and complies with federal, state, and institutional policies. Based on our most recent cost analysis, the rates have been increased to the following:

- Image de-identification (disc or upload)- \$63
- Lesion measurement- \$108
- Radiologist hourly- \$237
- Staff hourly- \$82

These rates will be effective January 1, 2025, for new studies. We understand that many study budgets are constrained and as such, studies that are ongoing will be approved to use the old rates until March 1, 2025. After that date, all services will be billed using the new rate.

Please do not hesitate to contact me if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Desma Jones", written in a cursive style.

Desma Jones
