[REGISTER NOW](#)

Registration ends on Monday, May 6, for an IAS–USA CME webinar designed for clinicians who care for transgender adults with HIV. It will review management of HIV prevention and treatment among transgender people taking hormones, with a focus on potential drug interactions, comorbid conditions, and laboratory monitoring.

WHO SHOULD ATTEND

This advanced webinar is designed for clinical decision makers who are actively involved in HIV care and research. It is also relevant for registered nurses, PharmDs, and other health professionals.

LEARNING OBJECTIVES

On completion of this webinar, learners will be able to:

- List common gender-affirming medical interventions
- Summarize recent data on drug interactions between gender-affirming hormone therapy and antiretroviral agents
- Describe best practices for medical monitoring of transgender people with HIV and on hormone therapy
