Validations definitions

Validations categories are not mutually exclusive (i.e., several categories can apply to a single validation). A validation can apply to multiple categories, such as a specific form version, an activity code and/or an FOA specific flag at the same time.

As an example, validation 018.3.2 agency Provide error if this value for *any* budget year is > 50K for R03 or budget year is >200K for R21 on the Modular budget applies to the following categories:

- Form version V1.2
- Agency NIH
- FOA Specific flag project_cost_exception_flag = Y
- Activity code Include R03, R21

CATEGORIES:

1. **Form Version Validations –** Validations can vary by version level of an individual form within a form package. The form version number column lists applicability of rule to all Included Versions and above.

Example:

- Form version Incl: 2.0 means the rule is applicable to form versions 2.0 and above.
- Form version Excl: 1.2 means the rule is applicable to form version 1.1
- 2. **Mandatory Validations** Validations required for eRA systems to successfully process applications and map them to the eRA database (i.e., IMPAC II). Apply to NIH and all Agencies using eRA systems to process grant applications.

Examples:

- The FOA must exist in the eRA database (000.19)
- DUNS on SF424 R&R cover form must exist in the eRA database. (001.8.1)
- 3. **Agency Specific Validations** Validations that are modifiable at the Agency level. Agency is determined by a parameter associated with the FOA. The Agency parameter will be exposed in the Submission Agency Data Service in a future enhancement.

Examples:

- Do not accept Pre-application as submission type (001.1.1)
- Do not accept changed/corrected application if the original application has been verified and not withdrawn (001.1.3)

4. **FOA Specific Validations** – Validations that are controlled at the opportunity level and triggered based on whether or not a specific flag (defined with the validation) is set for the FOA. The FOA Information Request in the Submission Agency Data Service (SADS) web service can be used to determine if the specific flag is set for an FOA.

Examples:

- Provide error if this value for any budget year is > 50K for R03 or budget year is >200K for R21 (018.3.2)
- Provide error if project period is more than two years long. (001.42.3)
- 5. **Activity Code Validations -** Validations that apply to a specific activity code (R01, T32...), a major activity code (F, K...), a program type code (SBIR, STTR) or a processing activity code (333, 777, 332 etc.)

Allowing validations to be controlled at the major activity code level facilitates logical groupings of activity codes. The 'major activity code' is the first character of the three-character activity code. For example, F31 and F32 share the major activity code of 'F'. Validations that apply to the F major activity code would apply to all Fellowship applications' Examples:

- Provide error if project period is more than two years long. (001.42.3)
- The application should be submitted with a modular budget. Applications where the applicant organization is foreign are exempt from this validation.
 (020.0.2)

Note: FOAs that utilize the 332 activity code are validated against the activity code of the awarded grant (Fed ID).

6. Applies to Single Project, Multi Project or Both - Validations that apply to Single Project applications, to Multi Project application, or both.

Examples:

- For a revision, if the parent grant budget is non-modular, only a detailed budget form may be submitted. (018.0.3)
- If Human Embryonic Stem Cells (HESC) Involved is Yes on any Other Component, then the answer must be Yes on the Overall Component (008.21.2)
- For a revision, the parent grant must be awarded. (001.6.10)
- 7. **Applies to Overall, Other Components or Both** Validations that apply to the 'Overall Component', Other Component or Both Overall and Other Component on a Multi Project application.

Examples:

- For a resubmission, a summary statement must have been released for the prior grant, unless the prior grant has been withdrawn without a summary statement (001.6.6)
- 8. Cross Component validations: Validations that cross component types such as Overall and Other Components for a Multi Project application.

Example:

- If Human Embryonic Stem Cells (HESC) Involved is Yes on any Other Component, then the answer must be Yes on the Overall Component (008.21.2)
- **9. Global Validations:** Validations that apply to the whole of the application.

Examples:

- For New and Renewal type of application, the number of iteration of a given component (defined by the component label in the FOA) need to match the number of iteration provided in the FOA data. (000.4)
- The FOA does not exist in the database (000.19)
- 10. Shared validations: Validations for fields that are common to multiple forms and uses the same rule logic (e.g., Validations against the State field).

Examples:

- If country not US, State must be blank. (001.16.2)
- If country not US, State must be blank. (001.57.3)
- If country not US, State must be blank. (001.85.3)
