

Thank you for referring your patient to UNC General/Acute Care Surgery and the UNC Hernia Center. It is our goal to provide your patient with the best possible care and outcome. Below you will find the required materials needed in order to refer your patient for each select diagnosis. These items are essential in being able to assess your patients need for surgery. Please use this checklist when gathering the required materials. Once we have received all these items, we will then contact and schedule your patient for a consultation with our Surgery Team.

Office fax number is 919-966-0369 or you can email referral to [acs@med.unc.edu](mailto:acs@med.unc.edu)

We also strongly encourage your practice to consider using UNC Carelink to send and track referrals/view clinical information. There are many benefits for your practice that UNC Carelink can provide. Please see attached handout about UNC Carelink. Thank you.

### GALLBLADDER DISEASE/STONES:

- Recent history and physical (include BMI)
- Right upper quadrant imaging (MRI, MRCP, CT scan, ultrasound) report less than one year old demonstrating gallstones and related biliary pathology
- Recent labs
- Patient's demographics
