

What is UNC CareLink?

- An online extension of UNC's new Epic electronic medical record that enables referring providers and staff to easily access patient information and follow the progress of care delivered at UNC Health Care
- Web-based portal for community providers and clinical staff
- Replaces current read-only WebCIS and read-only Cerner applications
- Provides access to view all medical records and ancillary services for patients referred by your practice

What are the benefits?

Shared medical record with community practices and staff

Enhances communication and keeps referring practices "in the loop"

Provides access to scheduled appointments, medications, allergies and outpatient and inpatient notes (including admissions, discharges and emergency services)

Helps with CMS Meaningful Use and patient-centered medical home efforts

Enables providers to send secure messages to UNC providers regarding their patient's care and access an unassigned patient's medical record

Contains historical WebCIS and Cerner information on your patients in addition to any new patient information

When will this be available?

- Access to view patient records will be available on April 4th for services delivered at the UNC Hospitals and Chatham Hospital and on June 20th for Rex Healthcare and UNC Physicians Network practices

How to enroll?

- Enroll online at unccarelink.org
