

Application Phase Committee Meeting 6/3/19

2020-2021 Calendar

Transition course remaining in February, with Application Phase starting in March
Approved and will be posted this week

Comments that go on MSPE

Students have 30 days to appeal their final grade, which often includes course comments. However per SOM policy, students are able to request changes to their MSPE comments “at will,” though the requests do not have to be granted.

Comments from Foundation Phase: PCC 3, SHS 1/2/3

Comments from Application Phase: evaluations

Application Phase Skills in PCC 3

PCC3 will incorporate CBLC, HISC, and CSP weeks: outpatient, inpatient, and special population focuses those weeks along with panel of MS4s, interns, residents who can provide context and tips for the wards. Content covered will include:

- Progress notes
- Calling consults
- Pre-rounding

Administrative Excuses

There is a current problem of students missing weeks at a time, making it up at a different time - how does that affect clinical learning as well as capacity issues?

Over-communication is key when it comes to taking a significant amount of time off.

Planning to develop criteria per block/course detailing:

- Max amount of time that can be missed before receiving an Incomplete, or being required to withdraw.
- Consequences/risks for missing specific thresholds of time.
- Potential options for making up time and/or remediation.
- These criteria would need to be approved by the Application Phase Committee and then the Education Committee.
